

# Road Watch in the Pass

## Update to Participants - Number 6

### Monitoring Wildlife Update

There are currently **51** people participating in the Road Watch Project.

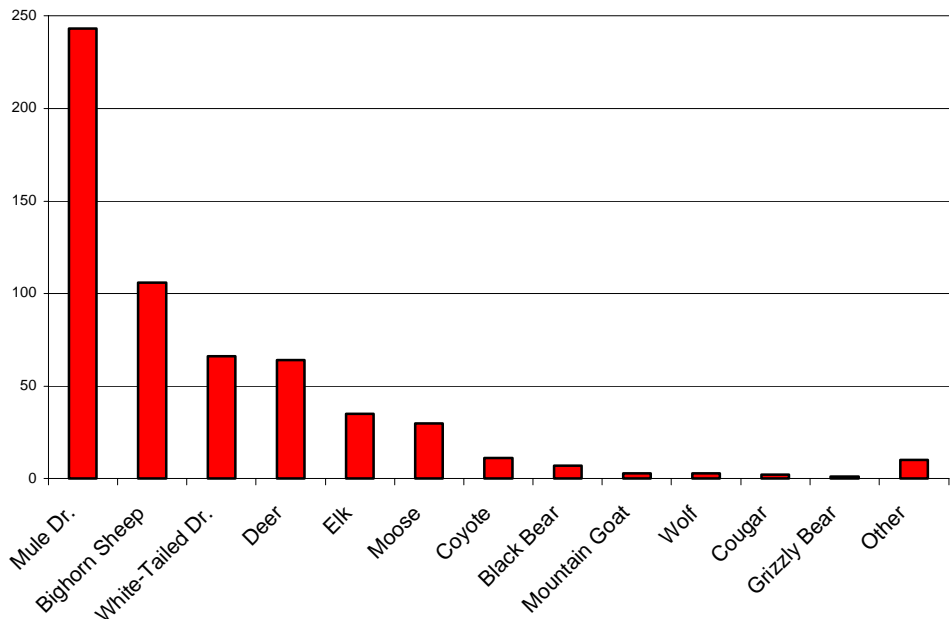

A total of **581** observations have been entered using the mapping tool or through the call-in line.

The graph to the right highlights the number of observations per species in Road Watch. Other species in the graph to the right includes a fox, weasel and eagles.

Of the 581 observations;

- 27 (5%) were reported as dead and 554 (95%) alive.
- 85 (15%) were reported as crossings and 496 (85%) as adjacent to Highway 3.

*With Generous Financial Support from the Woodcock Foundation, Alberta Ecotrust Foundation and TD Friends of the Environment Foundation*

### What's New at Road Watch

- Congratulations to Lanny Amos who won the latest Road Watch prize draw, a book by local author Ron Montgomery and a gift certificate to the Cinnamon Bear.
- Janet and Tracy demonstrated Road Watch at "Going Wild" held in the Albert Stella Arena during Rum Runner days, thanks to those who came and introduced themselves as Road Watch Participants.
- A stories page has been added to the website, if you would like to share a wildlife experience please email your story to Janet Quinn or drop it off at your local library.

### Coming soon

- Miistakis has recently produced a report that analyses mortality data collected by Volker's Stevens from 1997-2004. The report provides information on where wildlife are crossing and most commonly getting hit along Highway 3. This report will complement Road Watch data and provides examples of how we can analyse Road Watch data in the future. The report will be posted on the Road Watch website on the results page in late August 2005.
- Janet has revamped the Road Watch Pamphlet; stayed tuned for it's release.
